DETAILED ACTION

Claims 15-28 are pending.

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 15, 20, and 23-28 are rejected under 35 U.S.C. 102(b) as being anticipated by Rhodia Terres Rares, WO 01/10545, as evidenced by Blanchard et al, US 2006/0005465.

Rhodia Terres Rares and Blanchard et al are patent family members based on the same priority documents and are expected to have the same or substantially the same disclosure. The Blanchard et al reference is employed here as an English language translation of the French Rhodia Terres Rares reference. All citations refer to Blanchard et al and the corresponding disclosure in Rhodia Terres Rares.

See examples and claims. Although the use of palladium is not exemplified, it is clearly envisaged by at least claim 21 of the references.

Claim Rejections - 35 USC § 103

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

5. Claims 15-28 are rejected under 35 U.S.C. 103(a) as being unpatentable over Rhodia Terres Rares, WO 01/10545, as evidenced by Blanchard et al, US 2006/0005465.

Rhodia Terres Rares and Blanchard et al are patent family members based on the same priority documents and are expected to have the same or substantially the same disclosure. The Blanchard et al reference is employed here as an English language translation of the French Rhodia Terres Rares reference. All citations refer to Blanchard et al and the corresponding disclosure in Rhodia Terres Rares.

Rhodia Terres Rares and Blanchard et al (see examples and claims, particularly claims 17, 21, and 25-27) disclose catalytic organosol compositions employing at least one rare earth compound an amphiphilic acid and a diluent. Rhodia Terres Rares and Blanchard et al (claims 20 and 21) discloses the further incorporation of transition metals in the catalyst including iron and palladium

Rhodia Terres Rares and Blanchard et al differs from the claim in the exemplified combinations as claimed.

Rhodia Terres Rares and Blanchard et al clearly contemplate combinations of transition metals in the cerium materials as shown by example 3 employing iron of the references and claims 20 and 21 setting forth palladium.

Double Patenting

6. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

7. Claims 15-28 are provisionally rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 17-39 of copending Application No. 11/222,603. Although the conflicting claims are not identical, they are not patentably distinct from each other because the claims substantially overlap and/or are encompassed by the instant claims.

Furthermore, it is generally *prima facie* obvious to use in combination two or more ingredients that have previously been used separately for the same purpose in order to form a third composition useful for that same purpose. In re Kerkhoven, 626 F.2d 846, 205 USPQ 1069 (CCPA 1980); In re Pinten, 459 F.2d 1053, 173 USPQ 801 (CCPA 1972); In re Susi, 440 F.2d 442, 169 USPQ 423 (CCPA 1971); In re Crockett, 279 F.2d 274, 126 USPQ 186 (CCPA 1960). As stated in Kerkhoven and Crockett, the idea of combining them flows logically from their having been individually taught in the prior art.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
